

## WITHDRAWAL RATE RISK MAKING MONEY LAST.

WHAT'S A "SAFE" ANNUAL WITHDRAWAL RATE? A 4% withdrawal rate was once considered a "safe" amount that could be taken from your nest egg each year, based on research done in the 1990s. However, market conditions over the past decade have called the "4% rule" into question. When determining a safe withdrawal rate, it is important to factor in how retirement savings are divided between equities and bonds.

		20% Equities/ 80% Bonds	40% Equities/ 60% Bonds	60% Equities/ 40% Bonds	80% Equities/ 20% Bonds
TIME HORIZON	25 Years	4.3%	4.4%	4.3%	4.1%
	30 Years	3.7%	3.8%	3.8%	3.7%
	40 Years	3.0%	3.2%	3.2%	3.2%

<sup>\*</sup>Probability of success for all calculations is 90%. Success is defined as having \$1 left at the end of the time period. Morningstar - The State of Retirement: Safe Withdrawal Rates, December 2022
